The M40-series started in 1987 with the production of 1.8-liter four-cylinder engine M40B18. M40 engines came to replace the old M10-series, which was very successful and common for BMW models in those days. A year later, the manufacturer released the smaller version - 1.6-liter M40B16 engine. The engine is quite traditional and straightforward.

M40B16 Engine Problems and Reliability. All M40 series engines are quite good. Lifespan is about 180-200 thousand mileage. But of course, the M40B16 has some problems like unreliable timing belt, etc. The main issue of this engine is its age. Most of them need to rebuild or to replace some old parts, and all BMW parts are expensive.
